

Clean Earth Wins 2021 Acquia Engage Award

October 27, 2021

- Awards recognize global organizations for creating transformative digital customer experiences.
- Company wins best return on investment category with first-time entry.

CAMP HILL, Pa., Oct. 27, 2021 (GLOBE NEWSWIRE) -- [Clean Earth](#), a division of [Harsco Corporation](#) and a leading provider in environmental and regulated waste management services, today announced it has won a 2021 [Acquia Engage Award](#) in the best return on investment category. The Acquia Engage Awards recognize high-impact digital experiences that organizations around the world are building with the Acquia Open Digital Experience Platform (DXP), including Drupal Cloud and Marketing Cloud. Winners demonstrate an advanced level of functionality, integration, performance and user experience.

Clean Earth and agency partner, Elevated Third, significantly enhanced the Clean Earth website user experience by providing intuitive navigation and seamless one-stop browsing for users looking to learn about Clean Earth services, customer portals and resources.

Immediately after the site launch, Clean Earth saw significant increases in server response time and decreases in page load times and server connection times. These improvements helped drive an enhanced user experience when compared to our prior website.

"This award is yet another example of our team's dedication to taking our customer experience to the next level at every touchpoint including the technologies we use on a daily basis," said Clean Earth President David Stanton. "Our commitment to providing innovative environmental services in the most sustainable manner is integrated into everything we do."

"Showcasing the most impressive digital experiences, across industries and geographies, is a highlight of Acquia Engage," said Lynne Capozzi, Chief Marketing Officer at Acquia. "Each customer's story demonstrates the impact that creatively designed and thoroughly executed digital experiences can have on customer engagement and organizational performance."
