

Clean Earth Opens New 10-Day Hazardous Waste Transfer Facility in Caguas, Puerto Rico

July 28, 2022

- **New facility will increase capacity to transport hazardous and non-hazardous waste in Puerto Rico and the U.S. Virgin Islands.**

KING OF PRUSSIA, Pa., July 28, 2022 (GLOBE NEWSWIRE) -- [Clean Earth](#), a division of [Harsco Corporation](#) and a leading provider in environmental and regulated waste management services, announces it has opened a new 10-day hazardous waste transfer facility in Caguas, Puerto Rico. The new 5,900-square-foot facility increases Clean Earth's capacity to transport hazardous and non-hazardous waste from Puerto Rico and the U.S. Virgin Islands to Clean Earth's U.S.-based treatment, storage and disposal facilities (TSDFs) for processing and recycling.

This new facility supports the integration of Clean Earth's domestic infrastructure with service capability in Puerto Rico and the U.S. Virgin Islands for enterprise customers expanding their operations in U.S. territories.

Like all Clean Earth's 10-day facilities, the Caguas site accepts both [RCRA hazardous and non-hazardous wastes](#) from various industries including energy, infrastructure, commercial, industrial, consumer commodities, medical, and pharmaceutical markets. Customers may also transport their own material to the facility.

Clean Earth leased the warehouse property and secured all necessary permits in anticipation of growing demand in the region. The 10-day facility services 312 waste generators in Puerto Rico and the U.S. Virgin Islands, increasing Clean Earth's capacity to pursue business opportunities with retail companies operating in the area.

"The opening of a new 10-day hazardous waste transfer facility in Puerto Rico exemplifies Clean Earth's commitment to maintaining a national transportation network that offers customers the assurance that their waste is being handled responsibly," said Nick Grasberger, Chairman and Chief Executive Officer, Harsco Corporation. "With the expansion of this national transportation network into U.S. territories, Clean Earth is growing with its enterprise customers."
