 \times

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

In accordance with the disclosure requirements promulgated by the U.S. Securities and Exchange Commission, Harsco Corporation (the "Company") has undertaken efforts to determine the Company's conflict minerals¹ reporting requirements for the period from January 1 to December 31, 2015.

The Company has filed this Specialized Disclosure Report and the associated Conflict Minerals Report, which appears as Exhibit 1.01 hereto and is publicly available on the Company's website at http://www.harsco.com/about-us/safety-and-environment.aspx.

Reasonable Country of Origin Inquiry Information

The Company has conducted a good faith reasonable country of origin inquiry ("RCOI") to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources. The Company's RCOI process included conducting an inquiry of our direct suppliers using the Conflict-Free Sourcing Initiative's ("CFSI") Conflict Minerals Reporting Template ("CMRT"). Based on the results of the RCOI which indicated sourcing from the covered countries, the Company exercised due diligence on the source and chain of custody of the conflict minerals in accordance with the *Organization for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*^{2.} The due diligence efforts are discussed further in this Conflict Minerals Report.

Item 1.02 Exhibit

The Company's Conflict Minerals Report is filed as Exhibit 1.01 hereto.

Section 2 - Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit 1.01 - Harsco Corporation's Conflict Minerals Report for the period January 1 to December 31, 2015.

¹The term "conflict mineral" is defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo ("DRC") or an adjoining country.

²OECD (2013), OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Second Edition, OECD Publishing. http://dx.doi.org/10.1787/9789264185050-en.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Harsco Corporation

Russell C. Hochman Senior Vice President, General Counsel, Chief Compliance Officer & Corporate Secretary Date: May 31, 2016

CONFLICT MINERALS REPORT OF Harsco Corporation FOR THE REPORTING PERIOD FROM JANUARY 1 TO DECEMBER 31, 2015

I. Introduction

This is the Conflict Minerals¹ Report of Harsco Corporation ("we," "our," "us," "Harsco," or the "Company") prepared for calendar year 2015 in accordance with Rule 13p-1 ("Rule 13p-1") under the Securities Exchange Act of 1934 (the "Act"). Numerous terms in this Report are defined in Rule 13p-1 of the Act and Form SD and the reader is referred to those sources, and also to Release No. 34-67716 (August 22, 2012) of the Act (the "Adopting Release") for such definitions.

In accordance with Rule 13p-1, we undertook efforts to determine the content and source of the minerals within our products. We designed our efforts in conformity with the internationally recognized due diligence framework put forth in the *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*² ("OECD Due Diligence Guidance") and related Supplements.

The statements below are based on the activities performed to date and in good faith by Harsco and are based on the infrastructure and information available at the time of this filing. Factors that could affect the accuracy of these statements include, but are not limited to, incomplete supplier data or available smelter data, errors or omissions by suppliers or smelters, evolving definition and confirmation of smelters, incomplete information from industry or other third-party sources, continuing guidance regarding the SEC final rules, and other issues.

II. Overview

Company Profile

Harsco is a diversified, multinational provider of industrial services and engineered products serving global industries that are fundamental to worldwide economic growth and infrastructure development. Harsco has locations in approximately 30 countries, including the United States.

Harsco is subject to this rule as we have determined that, during 2015, conflict minerals were likely necessary to the functionality or production of products Harsco manufactured or contracted to manufacture. Harsco, as a purchaser of component parts, is many steps removed from the mining of conflict minerals. We do not purchase raw ore or unrefined conflict minerals, and we conduct no purchasing activities directly in the covered countries.

¹The term "conflict mineral" is defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo ("DRC") or an adjoining country.

² OECD (2013), OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Second Edition, OECD Publishing. http://dx.doi.org/10.1787/9789264185050-en

Reasonable Country of Origin Inquiry Information

We began our reasonable country of origin inquiry ("RCOI") by identifying product categories and consumables that may contain conflict minerals. Initial product categories and consumables within this scope included fittings, paint, motors, coatings, air motors, admiralty brass, pipes, welding wire, wire, electrical fittings, lubricants, glass, bushings, electronics, cables, steel parts, fabricated parts, machine parts, castings, hydraulic parts, bearings, power transmissions and tubular parts. Using information derived from Harsco's procurement systems, supplemented by information supplied by personnel in Harsco's divisional supply chain, we produced a list of direct suppliers of components and raw materials that may contain conflict minerals. We then conducted a good faith RCOI to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources. Our RCOI process included conducting an inquiry of our direct suppliers using the Conflict-Free Sourcing Initiative's ("CFSI") Conflict Minerals Reporting Template ("CMRT"). We sent reminders to those suppliers that did not respond to our request to complete a CMRT. Based on the results of our RCOI which indicated sourcing from the covered countries, we exercised due diligence on the source and chain of custody of the conflict minerals in accordance with the OECD framework. Our due diligence efforts are discussed further in this Conflict Minerals Report.

Harsco's operations fall into three reportable segments: Harsco Metals & Minerals, Harsco Industrial and Harsco Rail.

Due Diligence Program Design

We designed our conflict minerals program to conform, in all material respects, with the five-step framework of the OECD Due Diligence Guidance, the Supplement on Tin, Tantalum, and Tungsten, and the Supplement on Gold, specifically as they relate to our position in the minerals supply chain as a "downstream" company:

- Step 1: Establish strong company management systems
- Step 2: Identify and assess risks in the supply chain
- Step 3: Design and implement a strategy to respond to identified risks
- Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices
- Step 5: Report annually on supply chain due diligence.

III. Due Diligence Measures Performed by Harsco

The following describes the measures taken to reasonably determine the country of origin and to exercise due diligence in the mineral supply chain in conformance with the OECD Due Diligence Guidance.

Step 1: Establish strong company management systems

- a. Conflict minerals team We established a conflict minerals team that includes individuals from the appropriate business units and departments, including compliance, finance, procurement, sales, engineering, and legal. The team was structured to include the involvement from those in management roles to ensure critical information, including Harsco's conflict minerals policy reached relevant employees and suppliers. We also engaged Crowe Horwath, an international accounting and consulting firm, to assist us with our compliance efforts.
- b. Conflict minerals policy We adopted and published a policy highlighting our commitment to complying with the reporting and due diligence obligations required by the SEC rule and our expectations from our suppliers. The policy resides on our corporate website (http://www.harsco.com/about-us/safety-and-environment.aspx). It is reviewed annually and will be updated, if necessary.
- c. Internal engagement We developed a training program for internal use to educate relevant employees on our conflict minerals program and reporting obligations.
- d. Supplier engagement We communicated our conflict minerals policy and provided educational materials to our queried suppliers. Suppliers were provided information on the conflict minerals disclosure requirements as well as recommendations for developing, implementing, and documenting a conflict minerals compliance program.
- e. Company level grievance mechanism As recommended by the OECD Due Diligence Guidance, Harsco has established a grievance mechanism as a risk-awareness system for conflict minerals issues. Stakeholders can communicate directly and confidentially with our compliance officer.

f. Records management - We maintain records relating to our conflict minerals program in accordance with the recommended record retention guidelines of five years.

Step 2: Identify and assess risks in the supply chain

We performed the following steps as part of our risk assessment process:

- a. Identified products in scope Our conflict minerals team conducted a detailed review of the products manufactured or contracted to be manufactured during the Reporting Period to identify products that should be deemed in-scope as described by the Adopting Release.
- b. Conducted RCOI We utilized the industry-developed CMRT to query our suppliers for conflict minerals information. We requested this information from the Tier 1 suppliers who provide material and components for the products deemed in-scope by our conflict minerals team. We evaluated the responses from the templates submitted by our suppliers to determine our reporting obligation based on this RCOI. See Appendix I for a list of countries of origin identified through the RCOI process.
- c. Completed additional follow-up We contacted direct suppliers that did not respond to our request for conflict minerals information by the requested date. We also worked to clarify and validate the information provided by our suppliers.
- d. Identified smelters or refiners ("SORs") We compiled a list of SORs in our supply chain using our supplier's responses in their CMRTs.

Step 3: Design and implement a strategy to respond to identified risks

We performed the following steps as part of our risk management plan:

- a. Designed and implemented a plan We used established risk rating criteria to evaluate suppliers based on the responses provided within their CMRT, as well as any additional documentation furnished to support those responses and the suppliers' due diligence processes. The resulting risk ratings will be used to develop specific supplier outreach and training to address the identified risks and to take corrective actions with suppliers found not in compliance with Harsco's conflict minerals policy.
- b. Verified SORs As part of the risk mitigation process, we reconciled the list of SORs collected from suppliers to the list of smelter facilities identified by the CFSI's Conflict-Free Smelter Program.

Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices

Harsco relied on published lists from CFSI, London Bullion Market Association ("LBMA") and Responsible Jewelry Council ("RJC") to confirm the existence and verify the conflict-free status of SORs identified during our due diligence.

Step 5: Report annually on supply chain due diligence

Accordingly, this Conflict Minerals Report has been filed with the SEC and is available on our website at http://www.harsco.com/about-us/safety-and-environment.aspx.

IV. Product Description; Processing Facilities

Product Description - Harsco's operations fall into three reportable segments: Harsco Metals & Minerals, Harsco Industrial and Harsco Rail.

Harsco Metals & Minerals Segment

The Harsco Metals & Minerals Segment is one of the world's largest providers of on-site services of material logistics, product quality improvement and resource recovery for iron, steel and metals manufacturing. The Minerals business extracts high-value metallic content from stainless steel by-products and also specializes in the development of minerals technologies for commercial applications, including agriculture fertilizers. The Minerals business also produces industrial abrasives and roofing granules from power-plant utility coal slag at a number of locations throughout the U.S. Harsco Minerals' BLACK BEAUTY® abrasives are used for industrial surface preparation, such as rust removal

and cleaning of bridges, ship hulls and various structures. Roofing granules are sold to residential roofing shingle manufacturers in the U.S., primarily for the replacement roofing market. This business is one of the largest U.S. producers of slag abrasives and residential roofing granules.

Harsco Industrial

The Harsco Industrial Segment includes the Harsco Industrial Air-X-Changers, Harsco Industrial IKG and Harsco Industrial Patterson-Kelley businesses.

Harsco Industrial Air-X-Changers is a leading supplier of custom-engineered and manufactured air-cooled heat exchangers for the natural gas, natural gas processing and petrochemical industries in the U.S. Harsco Industrial Air-X-Changers' heat exchangers are the primary apparatus used to condition natural gas during recovery, compression and transportation from underground reserves through the major pipeline distribution channels.

Harsco Industrial IKG manufactures a varied line of industrial grating products at several plants in the U.S. and international plants located in Mexico and China. These products include a full range of metal bar grating configurations, which are used mainly in industrial flooring, as well as safety and security applications in the energy, paper, chemical, refining and processing industries. Harsco Industrial IKG recently introduced GrateGuardTM, a fencing solution for first-line physical security.

Harsco Industrial Patterson-Kelley is a leading manufacturer of energy-efficient heat transfer products such as boilers and water heaters for commercial and institutional applications.

Harsco Rail

The Harsco Rail Segment is a global provider of equipment, after-market parts and services for the maintenance, repair and construction of railway track. The Segment's equipment and services support private and government-owned railroads and urban transit systems worldwide.

<u>Processing Facilities</u> - Based on our due diligence process and the information received from our suppliers, the following facilities were identified by our suppliers as the smelters and refiners of the tin, tantalum, tungsten and/or gold present in and necessary to the functionality of products manufactured by Harsco in the year ended. The information from our suppliers is still evolving and may contain company level declarations. As such, this smelter list is presented in good faith as the best information we have to date. This list may contain smelters that are not in our supply chain and there may be other smelters not yet identified in our due diligence process. We will continue to update the list as our information and the relevant third-party data from CFSI, LBMA, and RJC improves.

V. Future Due Diligence

We will continue to communicate our expectations and information requirements to our direct suppliers. Over time, we anticipate that the amount of information globally available on the traceability and sourcing of these ores will increase and improve our knowledge. We will continue to make inquiries to our direct suppliers and undertake additional risk assessments when potentially relevant changes in facts or circumstances are identified. If we become aware of a supplier whose due diligence needs improvement, we may continue the trade relationship while that supplier improves its compliance program. We expect our suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.

In addition to those above, we will undertake the following steps during the next compliance period:

- Continue to collect responses from suppliers using the most recent revision of the CMRT.
- Engage with suppliers that did not provide a response in 2015 or provided incomplete responses to help with our data collections for 2016.
- Monitor and track performance of risk mitigation efforts.
- Compare and validate RCOI results to information collected via independent conflict-free smelter validation programs such as the CFSI.
- · Continue to allow verified conflict-free material from the region to enter our supply chain.

VI. Independent Private Sector Audit

In accordance with Rule 13p-1 and related guidance, an independent private sector audit of this report was not required for calendar year 2015.

APPENDIX I - Countries of Origin

The information provided in this Appendix is based on the information collected from Harsco's suppliers.

Angola France Portugal

Argentina Germany Republic of Congo Australia Guyana Russia Rwanda Austria Hungary Belgium India Sierra Leone Bolivia Indonesia Singapore Brazil Ireland Slovakia Burundi Israel South Africa Cambodia Japan South Korea Canada Kazakhstan Spain Central African Republic Kenya Suriname Chile Laos Switzerland China Luxembourg Taiwan Tanzania Colombia Madagascar Côte D'Ivoire Malaysia Thailand Czech Republic Uganda Mongolia
